

## PLANETARY COOKING

### **MARS** LIFE FAILED

Drawing was done aprox. 4.5 billion years  
after baking

## INGREDIENTS

## **MARS**

Serves 0

- \* **95% carbon dioxide**
- \* **3% nitrogen**
- \* **2% argon (40)**
- \* **0.13% oxygen**
- \* **0.07% carbon monoxide**
- \* **Pinches of argon (36), neon, krypton, ozone, and xenon**
- \* **Iron**
- \* **Nickel**

## DIRECTIONS

1. Combine all ingredients but Iron and Nickel in large bowl to form the atmospheric frosting
2. Combine iron and nickel in a smaller bowl until quite dense
3. Take contents of smaller bowl and roll into a spherical shape with your hands and bake until crunchy
4. Coat the baked ball with mixture from large bowl

## KITCHEN NOTES

In simple steps you've just baked yourself a Mars
